

Is this software still working with HP

Posted by Capthawg - 05 Sep 2012 21:02

i haven't seen very much talk about this brand compared to ARC. Is this still working with the scanner since the latest update

Thanks for your help

Many beleive it never DID work! It was the first software package advertised as a 3rd party product for the HP-1 and Butel had stated at that time that we was NOT going to offer a product. So, in desperation, I like some others bought from ScanCat. IMHOP it was a waste of time/money, was poorly ducumnted, not supported and brodered on being a 'rip off'. I imply wrote it off as a mistake, when ARC Patrol was announced I bought it in 'beta' and, as I expected, fully met my expectations.
