

Leeds Alabam New Frequencies

Posted by lfleming - 07 Jan 2013 22:20

Leeds Alabama switched to Digital Police Frequencies in mid 2012 and was wondering if any one could tell me what they are. I recently purchased a Home Patrol 1 Scanner and downloaded the software which was suppose to have all updated frequencies but I still can't pick up Leeds Police or Fire Departments

According to the note in RadioReference, the Leeds PD has moved to a MotoTRBO system. This kind of system cannot be monitored by any scanner at this time.

You can see what other agencies are able to be monitored in your area by going to www.radioreference.com/apps/db/?ctid=37
