

Sentinel request

Posted by Rtownsend - 31 Jan 2014 16:23

The ability to print "Quick Key" info, ability for the program to remember window size. Some windows open so big they fall off display. Using a Toughbook for radio programing. Might be easier on a PC with dual monitors. Having issues not being able to save a profile and create multi profiles. I opened another profile and all the "Favorite List" info was gone.

Wait until Butel comes out with software. Should be very soon now. It is head and shoulders above Sentinel
