

Need to talk

Posted by Vaampie - 09 Apr 2014 00:02

I would love to speak to some via phone on how to add frequencies to mt hp-1

We could trade phone numbers etc... Thanks for any response.

Hi Wayne,

Please disregard and delete from your computer the three files listed below as attachments. They have errors and corrections will be attached to some future post.

Thanks

Robin

Need a rest, if three work or no work, let me know. Restart tomorrow morning

Thanks,

Robin

Hi Wayne,

I was in an improper medical state during that last flurry of posts. I now see the situation clearly. I attached Chapter 2 prematurely, and it needs many additions and corrections as it is now. I am going to

attempt to remove it from my previous posts. I will attach two files to this post. They will be "the original plan"; and "Chapter one";.

Sorry for the bumbling,

Robin

Robin, if you have installed my zip code, on Home sentinel you will find the Atlantic City International Airport.. Also you will see the 177th air guard freqs. Thats What I want to enter.. That's what I was looking to do.. But what ever way you want to teach me on how to add additional frequencies is. Fine with me...

All we are doing is correct without reference to GPS co-ords, etc. The Global Co-ords that are useful are already in much of data that we are developing. It is part of the Sentinel DB and the RR DB.

I am attaching a reworked and completed Chapter two to this post. Probably won't add next chapter 3 for a couple of days.

Enjoy Chapter 2, it will change your outlook!

Thanks,

Robin
