

home patrol

Posted by n9lda - 25 May 2014 23:06

every since i tried to update back in oct i keep getting error sd card is corrupt

sometimes it tells me to remove sd card and wait a min. This does no good .

tried to up date data base and firmware no it dont work at all sentinel will read it but will not write keeps telling me corrupt hawii???

Right now cant get it to work help

bob

I would try to do a full format of the card then update the card using Sentinel.

You'll want a FULL format. I use this program:

www.sdcard.org/downloads/formatter_4/
