

Whats the status of the Analyzer function?

Posted by Wise87 - 24 Jul 2014 21:48

There have been small updates about the Wi-Fi module and the Siren App but no mention since the announcement video. What is the status of the Analyzer function? As it was Uniden didn't even tell customers that it would not be included during the release. It's still listed as a feature on the web site and one the box. Is this even going to happen?

Thanks

It's all good, all I really care about is getting Analyze working, and we obviously weren't getting any straight answers on RR.

There is a big difference between this site and RR. RR has been around in one form or another for many, many years. It also gets national media coverage and it covers more than 3 scanners and more than just scanners. So obviously it will have more viewers.

Well, we might be up to 4 scanners if the recent leak of the HP2 turns out to be true. I guess we'll find out in a few weeks.
