

Updating Database

Posted by 69stiles - 12 Oct 2010 21:40

I have received my HP today from Scannermaster. I updated firmware & database immediately. Once i fired it up, I couldn't receive my closest system which is Waterloo Region Public Safety. It would pick up systems that were 50 miles away like Peel & Bruce. Others say there's has updated databases new within a few days but mine says 12/09/2010. Now when I try to update my database it says I have the newest vrsion, yet still I have 12/09/2010. Why won't mine update?
