---

I rec'd my home patrol II. I programmed it. it looks like the data base has the old channels/freqs. how does the base get updated? I am in Schuylkill county pa. 17901. the county went to the Motorola P25 system. a few ems & fire are still on the old system which I am picking up, but the local police depts. have switched to the new system which I am not picking up. what to do? also how do I enable the discovery mode? thanks RSK
