

Independence P25 vs St Louis P25 ?

Posted by Conrad314 - 13 Oct 2010 13:47

Independence Public Safety (P25) and St. Louis Metropolitan Public Safety (P25)

Both of these systems have Independence Public Safety listed. The St. Louis P25 has the wrong location data and the Independence p25 has the correct.

If St Louis corrects the data, then the Independence folks will scan the same system twice?

Why the duplicate? It seems we need to delete the Independence site in the St Louis System.

Can an RR Admin chime in here?

I've added default location data to the St. Louis System that encloses St. Charles and St. Louis Counties.

Do we have confirmation that all TGID's on the Independence system migrated over as-is when they tied it to the St. Louis system?

I don't know the answer to that. Why would two cities be tied together that are on opposite sides of the state?

Just looks like Independence will be duplicated to me. :blink:

New to Missouri. Did not realize Independence actually is on the other side of the state.

Have to fix that one. Wikipedia gives latitude and longitude if that helps ?:blink:
