

Create Conventional Listing in a favorites list

Posted by K8POS - 10 Dec 2014 13:19

I attempted to add a Conventional listing to one of my Favorites list.

Name Tag = Amateur Radio

Department Tags= County1, County2, County3 ect.

Frequency = Frequency

Alpha Tag = Repeater Call Sign and Location

The is shows up in my favorites in both ARC patrol and Sentinel

but the HP-1 does not see it.

I have all the ones I have put in with a service type of HAM

What did I miss?

=====

Check the profile editor in Sentinel to see if they are marked for download and monitor before writing to the scanner..

.

That was it,

Had Location control set to on, soon as I turned it off things worked.

Thanks.
