I used it going through Louisville not long ago, HP-1 worked great there even on the new system and on Ft Knox as well as other systems too like the State Police digital system.

Hi. Been using mine in Louisville for several months. Haven't had great reception indoors. Plus, the local police dispatch has a roll-call everyshift, but I don't get that. I'm assuming they use a scrambled channel. Other than the battery not charging I love mine.

I've had mine sine October 2010. I was having reception indoors too. Bought a radio shack mobile antenna. Reception is so much better now. Retired firefighter. Don't listen to Police much.
