

## Weather Alert

Posted by jimmy5153 - 06 Jul 2015 00:43

---

I have had the Home Patrol for a year or so. It works very well. My question is (why doesn't the weather alert work when the radio is scanning? It works fine when on alert mode for just itself. I live in the east and we have severe storms with tornado activity. I want to scan and if a weather alert comes in it should take over the scanner mode.

Thank you for you time, Jim Uhrich

Because it can't :) It would require 2 "tuners" to be able to monitor the WX as well as scan.

No scanner can properly do that. Even those with Wx priority can miss the alert tone while stopped on something else.
