

## Wake Up Arizona

Posted by wa3pnt - 26 Aug 2015 20:10

---

Just thought I'd post a note to wake up the Arizona thread, since there have been no posts since 2013.

Not in the Phoenix area. Up in Chino Valley.

Enjoying the HP2, and also a BCD996P2. Have a new Whistler WS1095 on the way.

HP2 performed great on a trip up to WA and OR to do some Rodeos up there. The GPS add-on really makes scanning the services in the immediate area effortless.

Does anyone even check this Arizona thread, or is everyone on the Radio Reference Forum?

RodeoGeorge

I just discovered this forum today, so- there's that then :) WAKE UP SHEEPL- er, Arizona!

I will check in here, I don't like all the crowds on RR. I like to use radioref for database updates for frequencies etc but I don't like spending a whole lot of time on it.
