

## Home patro 2 scan list problem

Posted by Dan R. - 25 Aug 2017 22:47

---

Love my homepatrol 2 I got a couple of weeks ago. One problem though. I made a scan list which includes 2 counties (Loudoun and Fairfax counties). I appended the specifics from each county to my list, no problem. However, when I scan, only Fairfax County shows up. Can't figure it out. When I simply load ALL the frequencies for my zip code, then delete everything except Loudoun and Fairfax counties, it works fine.

Any suggestions what it could be ? Is it a setting I am missing. Could it be the card ?
