

MY HOMEPATROL 2 CANNOT CONNECT

Posted by toddjreese - 12 Aug 2018 18:13

Hello

My name is Todd Reese.

I seem to have run into an odd problem with the Sentinal Software..

I have Version 2.03.

Not only is Windows telling me that the Sentinal Software is from an UNKNOWN PUBLISHER, When I open the Sentinal Software and try to update the FIRMWARE and the HOME PATROL DATABASE, from HomePatrol.com, my computer tells me that it is unable to connect to the remote server

I am using Windows 10 Home Edition

I am using Windows Firewall

I am using Version 2.03 of the Sentinal Software

My User Account Control settings are set to Always notify which notifies me whenever someone or an app tries to make changes to the settings on my computer.

Any help or suggestion would be appreciated.

Thank You

Todd Reese
