It seems that Winnebago county sheriff might have gone to Starcom 21. Is this P25 type 2 digital or what? Who knows?

STARCOM21 is the statewide system in Illinois. I'd doubt that a Wisconsin county would be on it.

RadioReference shows all Outagamie-Winnebago County Law Enforcement, Fire, Highway, etc moving (or already moved) to a Project 25 Phase I system. See details at:

[www.radioreference.com/apps/db/?ctid=3122](http://www.radioreference.com/apps/db/?ctid=3122)

I found an article that says they went that way, same as Illinois. Just wondering why I cannot regularly hear the Sheriff Dispatch.

Supposedly another southern Wisconsin community went that way, too?? Advise if you know anything else. I used to have an officer living at the apartment community in Neenah with me, and he claimed it was handled (dispatching) by CELL PHONE??? I don't believe that. Another digital mode, maybe. Advise. Just found out what happened to Winnebago Cy. Sheriff: They are still Phase 1 as you said, but they have gone 100% encrypted,

hence you don't get to here the patrol division anymore. Another case where the general public is cut out from helping, even if they could!~

Really short cited, guys.

I gather other activity for Winnebago cy. is in the clear. I found out that I was confusing Winnebago Cy. in Illinois with the Starcom 21 comment.

This one's in Wisconsin, but the effect is the same.
