

NEW "Radio Scanning" D-STAR Net On RadioReference

Posted by DSRS WX4ADX - 20 Sep 2010 02:26

First, Congratulations to Uniden on the design of what we all KNOW will be an incredible radio scanner!

I spoke about the HomePatrol in detail tonight (in an educational presentation) on my NEW D-STAR Radio Scanning Net (DSRS).

If you are an Amateur Radio Operator with D-STAR (Digital Amateur Radio Capabilities) please join us on Sunday Evening's at 10:30 PM Eastern, 7:30 PM Pacific, on Reflector 12C (PAPA) which is based in Southern California, for the weekly DSRS Radio Scanning Net.

If you are a Scanner Enthusiast, please join us on Sunday Evening at 10:30 PM Eastern,

7:30 PM Pacific, via RadioReference. Live Audio: California, Los Angeles, System 12 PAPA. The Net will be highlighted in bold red letters as "LIVE Radio Scanning Net ON THE AIR".

The goal of this Net is to bring radio scanning enthusiasts into the Amateur Radio Hobby thru D-STAR and have those who have a passion for radio scanning, participate on the Net.

As Founder of DSRS, I am looking for scanner enthusiasts who are Amateur Radio Operators with D-STAR Capabilities to serve as Net Control as well as others to make radio scanning based educational presentations.

I made an education presentation tonight on the NEW Uniden HomePatrol, based on what information I found on www.homepatrol.com and thru information contained in the online Owners Manual.

A little about me...I have been in the radio scanning hobby for 35 years and started with a a Bearcat IV.

Additionally, in 1997, I founded the first radio scanning hobbyist group dedicated to TrunkTracking (G.O.T.T.E.M.) here in Orlando, Florida.

Thru DSRS, I hope to re-create the excitement of "radio scanning" once again, with the

HomePatrol, now that programming is not an issue.

I have programmed hundreds of Uniden 235, 895, 245 and 396's for Central Florida Resident's over the years, and now that I will not have to program as much; in my free time, my new goal is to re-stimulate people's interest in the radio scanning hobby thru the DSRS Net.

Please pass the word regarding this net.

I hope to place my "soon to be ordered" HomePatrol on RadioReference here in Orlando, in the weeks ahead.

7 3 (Best Regards)

Joe in Orlando, Florida

You will see that Radio Ref. lists Ham Freqs and I will say that from my area the repeaters can do either so it gets listed that way but should not be any indication that it can get DSTAR, it does not recieve those emmissions!! I hope that this clears this topic up regarding the issue.
