

## Why is Cobb P25 under statewide and not county?

Posted by plfinch - 31 Jan 2011 20:15

---

Is this an error or is there a reason for it? I live in Cobb and finally picked up an HP1. I entered zip, updated firmware (actually, was not needed), updated DB, and started scanning. Oddly, I got many metro counties but no Cobb P25. Then I noticed it was listed in the DB as a statewide system which I may have disabled. Setting up a favorite sorted things out but curious why it is listed this way.

The Cobb county system actually covers multiple counties. Systems that cover multiple counties fall under "statewide";

It is now listed under county systems.
