

Location Data in Missouri

Posted by Conrad314 - 01 Oct 2010 17:41

Looking through the location reports for Missouri...well we AREN'T looking to good.

Most of the counties I checked on do not have Geotags.

If anyone is going to buy a Home Patrol I recommend submitting location data and lets get the Missouri RRDB up to speed!

I have submitted numerous location updates in Missouri and am pleased to see the the RR administrators are quickly taking care of the updates. So thank you for that!

However we still have a ways to go.

Happy Scanning!

When I purchased my home patrol I looked into the Missouri area and not one city around KC had any location data besides the county default range. So I started submitting data like crazy to get the most out of my new location based scanner.

My intend was to get help from locals (users) with updating the RRDB, not to discourage the purchase of the HP-1. I personally love how easy it is to use and it's now my main travel scanner.

As for the RRDB, it's looking great! Thanks to UPMAN, MikeOxlong, Starcom21 and fast2okc!!! These folks spent plenty of time updating my submissions and even catching errors I've made. These guys cannot get enough applause!

Now looking forward to updates to the public works geotags. Heading into winter I personally enjoy listening to the local plows.

They are gently weeping.
