

North Jersey Train Frequencies for HP

Posted by darticus - 15 May 2011 17:37

Looking to find the channels for local trains. Mt Arlington by me has a new train station and I hear train horns on freighters at night. Anyone know how to find these frequencies in North New Jersey. I installed what is in the HP to a Local Favorite File but would these be the correct frequencies? Ron

Ron:

The Mt Arlington station is on the NJ Transit Morris & Essex, and Boonton lines.

On the Database, the frequency can be found in >>> New Jersey/Morris/Statewide/Railroads)/NJ Transit/Hoboken Division.

On the HP-1, NJ Transit trains are under the "Railroads" tag, along with Amtrak and CSX.

The freq is 161.400.

JM

PS> Took me a while to figure this out, and create a Favorite for it.
