

## Part Time ENC

Posted by Del1964 - 29 Jul 2010 07:12

---

Just wondering how the HP will handle "part time" ENC communications. I was listening to Shelbyville Dispatch yesterday at lunchtime and it was ENC....short time later communications were in the clear. Apparently they have the ability to switch back and forth and so I wonder if other agencies down the road will have this capability and if so and RR has the frequency marked as "ENC", will it be skipped? My personal preference would be to have the HP "include" the freq's marked as ENC and simply mute them if ENC is present....or have it buried in the menus to include ENC maybe as an advanced feature....with a "secret" combination of button presses for us more advanced listeners...

And I don't know if this is actually in the proper thread....maybe this should have been in General questions/concerns.
