

Monday Morning Update

Posted by motorman105 - 23 May 2011 06:51

Looking forward to downloading the Monday Morning Update to see if I get the rebanded CSP

@K1IFJ I was having this problem for months where I thought my scanner was going "deaf", almost sent it in. I kept updating the data base in my pc but not the unit itself. Now that I did a "write to Homepatrol" everything is fine (with the exception of Norwich PD). If you did this and are still not receiving then something else is up.

I found that it wasn't enough to simply delete the old CSP G Dispatch and Car to Car in a "FAVORITE" list and replace them from my new 5/24/2011 updated HP database...I had to delete the **ENTIRE FAVORITE LIST** and make a new one for the rebanded freqs to work.

Everything works fine now.

Yeah I find this to be the one major drawback to the Homepatrol unit. Why make a favorites list when it doesn't update and you have to make a new one every time?!?! Major PIA, I stopped making favorite lists, hopefully they will fix this.
