

ARC Patrol ?

Posted by n9mfk - 02 Jun 2011 12:03

Hi All,

is there a way in ARC Patrol to add cb band with out using a favorite list ?

Thanks Beau

No you are not. You can build your Favorites list from anything you wish in the main RR db. Just drag/drop the channels you want from the main db into your favorites list, save it, then scan your NEW favorite list that contains the channels you selected out of the main db.

Your reply doesn't sound like you are understanding my statement. The frequencies I wish to add are not in the main DB.

RadioReference doesn't consider these frequencies to be active and valid because RR takes the position that the Pennsylvania State Police is on the OpenSky system (which is not compatible with the HP1) when, in fact, several counties still use the original VHF frequency assignments since OpenSky is unreliable here.

I can't drag and drop anything because these frequencies don't exist in the database. I have to manually add them to be able to hear them.

If I have to manually create a Favorites list I think I fall into the situation where I can not listed to both the main list and the favorites at the same time.

If you're saying the only way to avoid this is to drag all the desired frequencies into a new favorites list

along with my manual entries I really don't consider that an acceptable option. It's not important enough to be to drag 150 or so desired frequencies from the main DB to supplement three manually entered frequencies.

You can open the PA database file in ARC PATROL and then add these frequencies.

BUT make sure you store a backup because the next time you update the database in the HP1 your custom changes will be lost.

Thank you, Gommert. I had read somewhere that this was possible and that updates overwrite the changes. I appreciate that you commented that it was possible to add these to the existing database. I've seen a lot of posts online saying that wasn't possible and a few saying it was.

You have another sale :)

hi Gommert,

can add the Marine frequencies

to the data base ?

thanks beau

Yes, you can open the database State files and add your own data like Marine. the only limitation is that with every online update the custom changes are lost so store backups or use favorites instead.
