

## Military air refueling and ranges in michigan

Posted by rooman - 09 Jul 2011 23:01

---

Is there anyone out there that monitoring air to air refueling and any of the ranges in michigan? I was wondering how the hp-1 worked on these freqs? any tips would be great.

The best is the one that completes the mission and brings you back. Best range is a function of aerial refueling before and after engagement. Countries either do or do not have aerial refueling capabilities.
