

## Extreme Upgrade register key for just one copy?

Posted by rick52768 - 30 Jul 2011 16:47

---

I am getting six HP-1 as was wondering if the extreme upgrade key will work for multiple copies of the sentinel software? I will have at least one copy on my laptop, which I plan to soon upgrade and I am sure that that I will have a backup copy stored with the local desktop. Also, if I purchase new HP-1s will they come with v2 updated firmware and do not need the upgrade register key? Thanks

Each key is generated based on a specific unit's serial number and is only valid for that one unit.

The Sentinel software requires no key. All new features in Sentinel are provided for free.

For the other question, see the blog entry I just posted (click Blog at the top of the page).

So to get the Extreme features, I will have to buy an upgrade key for each HP-1?
