

Also having CSP problems

Posted by paulct - 16 Aug 2011 18:13

Added CSP to a favorites list (in Sentinel). Wrote to home patrol. Selected favorites list and no CSP is available. Even when you "next"; through all the systems it did not show up!

So created another favorite list with just CSP, loaded both lists to home patrol and it works if I monitor multiple lists.

Very odd!

I think I solved my own problem, and this is probably obvious to the smart ones out there! If you just select a couple of talk groups (like Western Troop G Dispatch), you won't get anything. You have to have all those entries at the bottom of the CSP list in your favorites as well, as it has the actual frequencies in those entries.

At least that is my current guess!
