Wrong info

Posted by JPadia - 30 Aug 2011 10:08

_____

Greetings... I recently purchased several Home Patrols and ran into a problem when programming. I live in Lumberton, Tx. There are several police agencies that are not current. The area switched to a 800 system two years ago and the old as well as new numbers are available on RR.   Hard in County is my main issue. If you search Hardin County and scroll to the bottom of the page, click on Jefferson County regional radio systems under Hardin County trunked systems. There you will see it is a 2 county system and all of the numbers are available.   Also the Texas DPS system that the troopers talk through is not available or pulling up for Jefferson County.   I appreciate your help more than you know and look forward to doing more business in the future.

_____

If you look at RR, Home Patrol is using Dec #9820 for Hardin County Dispatch 1 which is a depreciated analog system. The county converted to digital years ago. The number that should be used for Dec is 21712 for Hardin County Dispatch 1 and so on in the system being it is now digital, not analog.   www.radioreference.com/apps/db/?sid=766
this link should bring you to the appropriate page. Check it out under Hardin County talk groups. Once again, greatly appreciating your help coach. Trying to explain it the best way I know how

_____

I checked, and 21712 is being loaded/scanned, too. Of course, it is a bit far from DFW for me to check on reception...
