

P25 One Freq Trunk

Posted by mikeoxlong - 04 Sep 2011 14:33

When a P25 One Freq Trunk system is created and written to the HP-1, it will read back in as a Motorola system.

It doesn't seem to track the system at all.

The HP-1 sees activity on the frequency but will not stop even with ID Search ON.

I'm not sure if ARC Patrol (build 004) is writing it as P25 One Freq or Motorola.

Thanks, I will fix this in the next build.
