

ARC Patrol vs Sentinel version 2

Posted by antennahead - 04 Sep 2011 21:06

I bought ARC Patrol when I first got my HP-1 and used it to add some frequencies that were not in the main database. Other than that I have not used it for anything else. Now that the updated sentinel allows you to program, does ARC Patrol have any features that still prove useful or to simplify should I just stop using ARC Patrol?
