Unknown TGID 28496 found a month or so ago, sounded like PD but not sure. It doesn't appear to be a Central Zone group, possibly South though.

And a whole list of TGID's that have not been ID'd as of yet. There are 199 of them. It is possible, but not likely that a couple could have snuck in through another system such as Ohio MARCS but it's rare for me to receive them as the nearest sites 70 miles away but on occasion I do pick up Darke Co Ohio site.
