

A Few Forum Requests

Posted by randybcd396t - 07 Jan 2012 15:38

1) Can you display the date/time of the post within a thread? I'm not talking about the thread date, but within the thread the date and time of the posts.

2) In a thread, have the option to display the first unread post.

3) Ability from the root to mark all topics read.

4) Increase font size in message box when creating a post.

Thanks for considering these items.

1) Can you display the date/time of the post within a thread? I'm not talking about the thread date, but within the thread the date and time of the posts.

FIXED

4) Increase font size in message box when creating a post.

FIXED

Thanks...
