

## LIRR: Anyone got this to work???

Posted by Neil - 06 Oct 2010 10:33

---

I've posted this problem in a couple spots but have had no help. I am unable to get the Long Island RR frequencies to appear in any HP service selection. I try to choose Railroad, or Transportation and they simply just do not appear even with Range set to highest. They ARE in the database (actually in two spots): USA>New York>Nassau (and in Suffolk)>Statewide>Railroad>Long Island Railroad. And, I am able to make them into a favorites list and when I install the favorite list in the HP it scans them fine and there is all sorts of activity on them. But I don't want to have to use a fave list to scan them!

Can anyone in the Long Island area give this a shot for me? Or, even just try outside the area to see if you can get them to setup? Is anyone scanning the Lobng Island RR with thir HP and can give me a clue here? Thanks!
