

## Boston Fire Dept rebanding / narrowbanding freqs

Posted by Respond4you - 23 Mar 2012 12:41

---

Here is the latest list of rebanded frequencies for Boston Fire Dept which are already in use as of 3/23/2012

this list is directly from Boston Fire Alarm hopefully sentinel will update them soon

[bfradio.net/Channels.html](http://bfradio.net/Channels.html)

You'd be better off submitting them to Radioreference since they're the ones who maintain the database that Sentinel's database is built from.

Hmmm. Those are UHF frequencies...nothing to do with rebanding, which is only for 800 MHz. But, whatever it is, looking at the database, these changes have been made and will issue with Monday's release.

I checked earlier today and it looks like everything had been changed except the first two channels.

The admin for the area seems to be on top of the changes and will probably update the channels as they're confirmed as being updated.
