

Home Patrol and DSD

Posted by mciupa - 03 Feb 2013 17:09

Just wondering if any members in Ontario are using the Raw Data Output feature of the extreme upgrade in conjunction with the DSD monitoring software?

In and around Toronto we have a soup of NXDN, TRBO, TDMA X-2 etc.. I'm at the garbled audio stage in my decoding, so I'm almost there.

I'd like to hear of any other experiences from people decoding in Ontario.
