

Version 2.3 vs 2.4

Posted by tonya - 23 Feb 2013 05:21

I've been reading posts on the 2.3 and 2.4 versions lately. I am in the Cleveland area did the upgrade when it first came out and I think the reception on the 2 new systems here is not bad. The new Cleveland IP-25 does real good from my house but I'm real close to a tower site downtown. The Cuyahoga IP also does ok but again I'm about 10 miles from the Wickliffe tower. I'm just curious on what other folks in this area think.
