

2 Home Patrols

Posted by OnMontauk - 05 Aug 2013 17:16

I have two Home Patrols, set up differently. When I use the Sentinal software, it tries to make the HP's the same. How can I make it so Sentinal will let me update favorites on two different units, without trying to add favorites from the other unit?

Give each unit a name in the Sentinal .

Just a stab in the dark here, but maybe by creating separate profiles; one for each unit (?). I know that profiles can be set up for different locations, Favorites Lists, etc.

However, the Sentinel software may be set up to only work with one unit; i.e., it may have coding within the program that matches parameters with the one unit (?). For instance, I know that the Extreme Upgrade requires the activation code to match that within the unit so that only one upgrade per unit would be possible. Anybody, am I correct?

I'm just sharing what I am thinking "out loud" as I sit here thinking about this one. This sounds like a job for UPMAN!
