

Round Rock PD
Posted by KD5WEK - 11 Apr 2015 00:37

Hey all,

Been a scanner enthusiast for a god while now and currently own the HP1. I like it and all but am wondering why I cannot hear Round Rock PD? I did go and check the version of the database I have and its recent, bout a month out. but I have not been able to hear them for a while.

FW is 2.05

DB is from the first of March.

I did go and look up RRPD and its still listed as being part of the GAATRS System which is P25 phase 1. I do hear other things on this system all the time however when I hold on something for GAATRS > Williamson County - Round Rock > RRPD N Dispatch or others in the RRPD selection I get nothing but pure silence. The HP1 appears to be receiving something as indicated by the signal bars flashing but never any audio..

Can someone tell me if this group have changed in some way ??

Thanks

Adam

Looking at the RR database it appears Round Rock PD is encrypted.

www.radioreference.com/apps/db/?sid=2
