

Installation of HomePatrol_Sentinel_2_03_02

Posted by hawks4ever - 20 Aug 2016 17:12

Trying to install HomePatrol_Sentinel_2_03_02 on my Window 10 PC. Once I start the setup program I get the following message, "This setup requires the .NET Framework version 2.0. Please install the .NET Framework and run this setup again. The .NET Framework can be obtained from the web. Would you like to do this now? Yes No" I installed .NET Framework 4.0 and trying installing HomePatrol_Sentinel_2_03_02 again but it keeps coming up with previous message, which is preventing me for installing the software. What can I do to get around this problem?

Install 2.0 - they are not cumulative (at least not entirely).
