

Nationwide database all avoided (turned off)

Posted by K7LTF - 04 Nov 2017 19:20

hello -

batteries died and I replaced them with fresh ones. At the end of the day when I installed the new cells, I noticed that the nationwide database was completely locked out. How do I re enable, and would it be through the radio or sentinel. Before this no changes were made, with the exception of the usual database update.

Thanks Zach
