

Iowa HP-1 owners

Posted by jmmather - 11 Apr 2011 10:10

Hi all. Just got an HP-1 and love it so far. Noticed a big improvement in reception over my older RS PRO-92. Not much Digital usage here in central Iowa yet so can't report on how well it works. Anybody else around have any "good" finds using the HP-1? :)

When something comes across that I probably do not wish to listen to, I tap the illuminated channel with my fingernail. This holds the scanner there long enough for me to think. After I click the arrow on the right, I have about a second to click Avoid. After you click the Avoided channel again, away she goes to scanning. The avoided channel should not reappear.
